CORE SKILLS

- Cloud architecture (AWS, Azure, GCP)
- Kubernetes (EKS, AKS, OpenShift)
- Infrastructure as Code (Terraform, Ansible)
- GitOps (Flux CD, ArgoCD, Helm)
- DevSecOps & WAF (Akamai, NGINX App Protect)
- High availability & performance tuning
- Cloud migrations & e-commerce platforms
- Penetration testing (OSCP)
- Team leadership & cloud consulting

TOOLS & TECH

- AWS, Azure, GCP, EKS, AKS, OpenShift, Fargate
- VMware, Proxmox, Hyper-V
- Jupyter
- Terraform, Terragrunt, Ansible, Puppet, CloudFormation
- Jenkins, GitLab CI/CD, GitHub Actions
- ArgoCD, FluxCD, Helm, Kustomize, ESO
- HashiCorp Vault, Kyverno, Cosign, Trivy, Falco
- NGINX + App Protect, Akamai WAF, Cloudflare, NAXSI
- Burp Suite, Veracode, SonarQube, Dependency Track
- Prometheus, Grafana, Datadog, Kibana, ELK, InfluxDB
- MySQL, PostgreSQL, MongoDB, Redis, Kafka, RabbitMQ
- Cisco IOS, Fortigate, F5 GTM, HAProxy
- Bash, Python, Lua

LANGUAGES

- Romanian — Native
- English — Advanced

EDUCATION

Bachelor's Degree, Management
Bucharest University of Economic Studies

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)

Chicinas Ionut-Marius

Senior Lead DevOps Engineer & Cloud Architect

PROFILE

Senior Lead DevOps Engineer and Cloud Architect with 13+ years of experience designing, automating, and securing infrastructure for enterprise and high-traffic platforms across Europe. Proven expertise in AWS, Kubernetes, Terraform, CI/CD, and DevSecOps, with hands-on leadership in cloud migrations, Infrastructure as Code, and high-availability architecture. Certified CKA, OSCP, and Azure Administrator, with a strong consulting background and a track record of delivering in remote-first, international environments.

PROFESSIONAL EXPERIENCE

DevOps Engineer | Cloud & System Administration Expert | Net Wise Solutions

Nov 2023 – Present

- Delivered high-availability AWS infrastructure for a large-scale Magento e-commerce platform.
- Migrated and modernised Magento infrastructure to AWS using Kubernetes (EKS), Terraform, and GitHub Actions.
- Built a secure, scalable AWS cloud infrastructure supporting thousands of concurrent e-commerce users.
- Migrated applications between AWS accounts and from legacy EC2-based infrastructure to AWS EKS.
- Automated deployments via Helm charts and Jenkins pipelines, improving release reliability and speed.

NGINX DevOps Engineer / Network Engineering | ING Belgium

Apr 2023 – Nov 2023

- Set up NGINX configurations for new implementations across Dev, Test, Acceptance, and Prod following SDLC; managed existing implementations.
- Configured Symantec Management Center for new and existing implementations.
- Handled incidents and supported application teams during troubleshooting.
- Participated in release reviews and executed deployments across all environments.
- Authored runbooks for F5 GTM and outgoing proxy implementations.
- Monitored and renewed SSL certificates.

Tools & Technologies: Azure DevOps, NGINX, Docker, Maven, Elasticsearch, Kibana, Kafka, F5 GTM, Symantec Management Center

DevOps Team Lead | Altex Romania

Oct 2020 – Apr 2023

- Owned security and uptime of e-commerce platforms.
- Built end-to-end pipelines for application delivery.
- Migrated apps from EC2 to Fargate / EKS containers and containerised legacy microservices.
- Architected and deployed EKS infrastructure with high availability and business continuity in mind, using Route 53 for easy DR.
- Built the entire infrastructure as code using Terraform reusable modules.
- Created Jenkins deployment pipelines designed for scale (master with dynamic agent spawning).
- Standardised deployments using Helm charts.

DevOps Engineer | Deutsche Bank

Oct 2020 – Apr 2022

- Offensive Security Certified Professional (OSCP)
- Microsoft Azure Administrator
- Cisco CCNA
- Linux Foundation: Kubernetes Fundamentals (LFS258)
- Linux Foundation: Kubernetes Security Essentials (LFS260)
- Offensive Security PEN 300 — Evasion Techniques and Breaching Defenses

- Developed end-to-end pipelines aligned with SDLC requirements.
- Implemented monitoring for OpenShift apps using Prometheus, Alertmanager, and Grafana.

Tools & Technologies: Jenkins, Ansible, Helm, OpenShift, Kubernetes, Gradle, Maven, JUnit, Selenium with Cucumber, Prometheus, Alertmanager, Grafana, SonarQube, Veracode

DevOps Engineer | Fly Go Group

Mar 2018 – Dec 2022

- Managed multi-cloud infrastructure across GCP, AWS, Hetzner, and DigitalOcean.
- Supported monitoring and performance debugging across the platform.
- Migrated apps from GCP to AWS, then to alternative providers.
- Developed deployment pipelines and performance testing scripts using LocustIO.

Tools & Technologies: Terraform, Jenkins, Ansible, Kafka, Puppet, NGINX, LocustIO, Zabbix, Nagios, AWS, GCP, Hetzner, DigitalOcean, Docker, Kubernetes

DevOps Team Lead | Axsys Business Technologies

Jan 2017 – Oct 2020

- Designed and developed automation recipes and deployed entire cloud infrastructure for microservices.
- Provided cost estimations, project plans, timelines, and risk identification for management.
- Coached team members and set career paths; owned 24/7/365 infrastructure availability.
- Designed and deployed cloud infrastructure for the e-commerce platform of Romania's biggest Electro-IT retailer.
- Migrated entire infrastructure from on-prem monolith to cloud-based microservices.
- Migrated to an external CDN — geo-optimised transfer and automated resizes for improved page load.
- Implemented WAF protection for OWASP top 10 attacks and a security audit tool across the entire infrastructure.

Tools & Technologies: CloudFormation, Terraform, Puppet, Ansible, Fargate, EKS, VPC, ECS, ECR, ALB, ELB, CloudFront, ElastiCache, Route53, CloudWatch, RDS Multi A-Z, MySQL, MongoDB, PostgreSQL, Elasticsearch, Redis, NodeJS PM2, Varnish, NGINX, HAProxy, Jenkins, DataDog, Nagios, Prometheus, Grafana, PagerDuty, ELK with Wazuh, FreeIPA, Docker, LocustIO, VMware vCenter/vSphere, Hyper-V, Cisco IOS, FreeBSD, CentOS

Team Lead — IT OPS | Altex Romania

Jul 2015 – Jan 2017

- Designed, developed, and managed data centre infrastructure with security, high availability, and scalability in mind.
- Designed and deployed a new scalable, redundant private cloud allowing compute consolidation.
- Identified infrastructure solutions that met cost and business targets while moving toward strategic future state.
- Optimised systems to withstand high traffic during peak periods.
- Designed and deployed a hybrid cloud with VMware vSphere clusters, DPR for backup/replication, HPE 3PAR Storage, and a fibre channel SAN.
- Implemented VLAN segmentation isolating dev, stage, and production.
- Automated VM provisioning with Puppet/Foreman in vSphere following CIS Benchmark recommendations.

Tools & Technologies: VMware vSphere, DPR, HPE 3PAR Storage, fibre channel SAN, Puppet/Foreman

System Administrator | SoftVision

Nov 2014 – Jul 2015

- Managed and supported all RedHat Linux servers and commercial app servers.

- Operated production environments on Microsoft Hyper-V 2012 clusters.
- Used NetApp and Compellent NAS/SAN storage for web hosting.
- Built a scalable web hosting environment with shared filesystem, WAF, web accelerator, and MariaDB-Galera multi-master cluster.
- Built application-specific monitoring checks and assisted developers in debugging.
- Implemented a centralised identity and policy authorisation platform across all servers.

System Administrator | Altex Romania

Nov 2013 – Nov 2014

- Provided Level 3 support and consulting to the development team.
- Maintained network and systems within optimal parameters; managed datacentre and ISP relationships.
- Designed a new datacentre infrastructure and migrated to a fresh standardised UNIX/Linux setup.
- Designed and maintained a Proxmox cluster.
- Designed and integrated a GlusterFS distributed replicated volume into production.
- Improved Layer 2 high availability via Cisco stackable switches and LACP.
- Improved Layer 7 security via WAF and solved scalability issues for heavy-traffic periods.

Research & Development Specialist | Madrivo Media LLC RO

Apr 2013 – Nov 2013

- Researched Hotmail/Outlook.com, Gmail, and Yahoo! email-marketing infrastructure.
- Performed penetration testing across the platform.

Tools & Technologies: PowerMTA, Wireshark, DNS tools, DKIM, SPF, cPanel, NGINX
